

Special Assessment Committee Meeting

Thursday, September 6, 2022 at 4:00 PM

City Council Chambers, City Hall (10 3rd Ave SW)

Any person needing special accommodation for the meeting is requested to notify the City Clerk's office at 857-4752.

1. CALL TO ORDER

2. PUBLIC HEARING: PAVING & UTILITY DISTRICT 2021-1

This improvement district is a petitioned project brought forth by the Minot Park District. The project provides the necessary municipal utility services and adequate roadway access to the Magic City Discovery Center development located on 1st St NW. This area is also known as Overlook Park Addition. Details are included in the attached Engineer's report. The total amount assessed is \$2,975,072.07.

Documents:

3. ADJOURNMENT

ENGINEER'S REPORT
Paving & Utility District 2021-1
CITY PROJECT 4585

Project Background

This project was first initiated to provide a shovel ready project to upgrade the existing 1st Street NW rural asphalt roadway into a fully compliant City of Minot local road that would serve the impending development of the Magic City Discovery Center (MCDC). The project began as a Minot Park District general assessment project with the final design completed by our engineering consultant (AE2S) while under contract to a 3rd party working on behalf of the Minot Park District. The plans and specifications were previously submitted to City Engineering Department staff and were approved on 19 May 2020 in anticipation future construction to occur within 1 calendar year.

In late 2020, the MCDC received US Department of Defense grant funding that allowed the MCDC board of directors to authorize final design plans for the MCDC, retention of a construction manager, and to solicit public bids for construction. This expected but quick success required all parties to evaluate the timing and sequencing of various community activities.

For myriad reasons that serve the larger common interest of the community, the project has been transferred over to the City of Minot for construction. The Petition for Special Assessment Improvement is attached. The City of Minot has entered into an agreement in principle with AE2S to finalize various sundry design tasks to transition the previously approved construction plans, bidding documents, and construction documents to City of Minot forms, and to provide bidding and construction phase engineering services. The design work has been completed.

Draft versions of bidding documents, construction documents, and an engineering agreement have also been completed by AE2S.

Proposed Improvements

An overview of the project plans and district boundary are attached.

The project will remove approximately 2,000 LF of existing 24' wide asphalt rural road section on 1st St NW from 19th Ave NW to 15th Ave NE and replace it with City of Minot Standard 31' road. Other beneficial activities of the Work include, but is not limited to the following:

- Construction of a regional storm water collection system to collect storm water and route it to a regional storm water pond
- Construction of a regional detention pond and outlet structures that will receive storm water from the road way and the MCDC site, thereby freeing up land area for the MCDC to construct parking and other site amenities; the pond will also provide

storm water quality and flow detention to further compliance with City, State, and Federal water quality rules

- Construction of sanitary sewer mains in accordance with City of Minot standards, and service laterals that will connect to the MCDC sanitary system and to future park developments contemplated by the Minot Park District
- Construction of water mains in accordance with City of Minot standards, and service laterals that will connect to the MCDC potable domestic and potable fire suppression water utilities, and to future park developments contemplated by the Minot Park District
- Construction of LED street lighting in accordance with City of Minot standards, in an area where existing lighting does not comply with Minot standards
- Improvements to existing parking areas owned by the Minot Park District that will serve the MCDC, thereby relieving them of site constraints that would reduce their capacity to construct the facility and site amenities to the level needed to maximize the chance of operational success
- Reconstruction of recreational sport field features where the necessary alignment of the road right of way impacted the field; the impact is limited to one ballfield at the Minot Park District Sertoma complex.

The project is phased into two portions of work during the 2021 construction season. The date of Substantial Completion is established as 30 October 2021, at which time the roads and utilities will be complete, leaving only the sidewalks and landscaping to complete in 2022. The date of Final Completion is established as 30 June 2022.

The work in 2021 is phased into two milestone dates that are timed and coordinated with the MCDC construction project. Three milestone dates define the project completion schedule:

- Milestone 1: Completion of underground utilities, including storm water pond, south of project station 9+00, no later than 21 June 2021
- Milestone 2: Completion entire road south of project station 9+00, no later than 04 July 2021
- Milestone 3: Project Substantial Completion to include all work except sidewalks, shared use paths, final grass seeding and grow-in, on or before 31 October 2021
- Final Completion no later than 30 June 22

Standard liquidated damages are included in the construction contract.

Subject to Council authorization, bid advertisements are scheduled to start on 22 January 2021, with a proposed bid opening date of 23 February 2021. Bids will be received and publicly opened at City Hall per normal City policy.

Project Justification and Benefits

The project is necessary to provide municipal utility services and adequate roadway access to the MCDC development. A project schedule is attached.

The project will also spur future development of a new park in the area at the intersection of 19th Ave NE and 1st St NW, called Overlook Park.

Cost Estimate

A detailed cost estimate has been prepared and is attached, as summarized below:

CONSTRUCTION TOTAL	\$2,433,590
10% CONTINGENCY	\$243,359
SUBTOTAL	\$2,676,949

Contract ENGINEERING	\$200,700
8.0% ADMINISTRATION	\$214,155.92
1.0% MISCELLANEOUS	\$26,769.49
6.0% FINANCE	\$160,616.94

TOTAL	\$3,279,191
--------------	--------------------

A Preliminary Assessment Roll is also attached.

Recommendation

It is recommended that the City Council adopt the following resolutions:

1. Create Paving & Utility District 2021-1
2. Direct preparation of the Engineer's Report
3. Approve the Engineer's Report
4. Direct preparation of Plans and Specifications.
5. Approve the request for AE2S to provide the necessary engineering services and authorize the Mayor to sign the contract on the City's behalf.
6. Waive the Resolution of Necessity and Public Hearing since all of the district area has petitioned for the project.
7. Approve the Plans and Specifications and authorize a call for bids.

PETITION FOR SPECIAL ASSESSMENT IMPROVEMENT

TO: City Council
City of Minot, ND

Council Members:

We, the undersigned owners of property abutting the street, avenue, or alley in the City of Minot on which improvement is to be made, as indicated below, do hereby petition the City Council for the following:

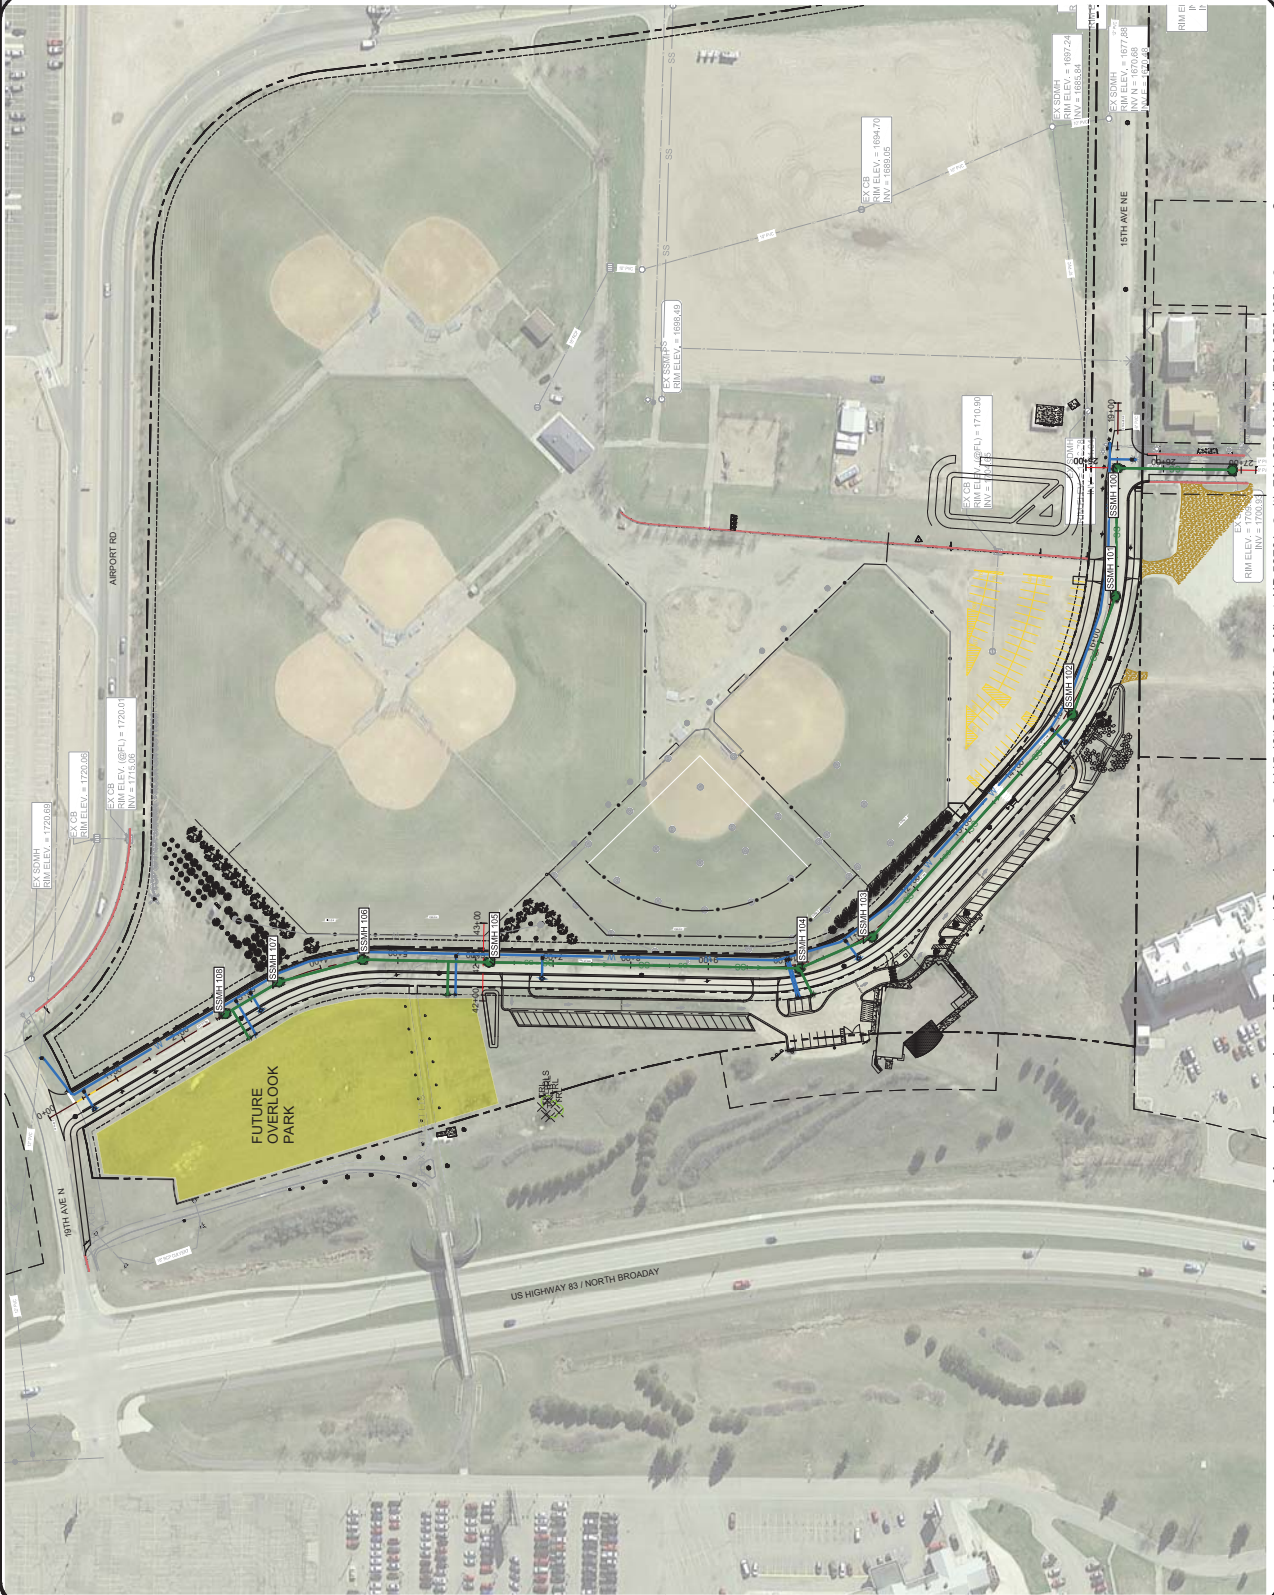

Urban street and lighting construction with sidewalks, water, sewer, storm sewer utilities and incidental items

(type of improvement)

Location: 1st St NW and 15th Ave NE/NW from 1st St NE to 19th Ave NW

The work is to be accomplished under the special assessment plan, as provided by law, and paid for by special assessments against benefitting properties and/or with such other financial assistance as may be legally available from other sources.
