Demolition and Excavation Criteria

Excavation: Contractor/Owner shall have site completely filled in with compacted, suitable backfill graded to drain storm water runoff to keep it from ponding, and (ii) then have the filled site/disturbed area covered with topsoil and seeded with a turf/grass mix.

If site is to be left open without progress in the construction for more than 3 days the Contractor shall secure any hole, pit, trench, excavation, foundation, basement, cellar or other unnatural downward slope by either (i) a durable fence at least four feet in height, or (ii) a weatherproof cover capable of sustaining a weight of 500 pounds of pressure for each 10 square feet, whichever is appropriate and best-suited to bar all reasonable and normal access to the unsafe condition and properly restrain and safeguard children or other persons from falling into the opening.

Contractor/Owner shall be responsible for all requirements to disconnect sewer, water, electrical, gas. If service disconnect is permanent the disconnection will be at the main for both for sewer and water. A final inspection is required from the Water Department to ensure proper disconnection.

All hazardous debris shall be separated

If leaving a foundation it must be inspected by a structural engineer before rebuilding on it.

Upon completion of the listed standards a final inspection is required.

SITE WILL BE FILLED IN AND MADE SAFE.

AS PERMIT APPLICANT, I ACKNOWLEDGE THAT I HAVE BEEN MADE AWARE OF THE ABOVE STATEMENTS AND CONDITIONS.
